

Hasan Mohammad Sayem

Full Stack Developer | AI, NLP & LLM Enthusiast

Badda, Dhaka | sayemhasan4700@gmail.com | 01705298966 | github.com/SayemHasan74

Profile

CSE student from BRAC University focused on full stack development, backend APIs, dashboards, desktop tools, AI, NLP, and multilingual large language models. Comfortable building practical software from API integration to polished interfaces, with a research interest in Bangla language technology and model evaluation.

Skills

Frontend	HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS, Responsive UI, Dashboard UI
Backend	Node.js, Express, REST APIs, MongoDB, PostgreSQL, MySQL, Authentication, API Integration
AI & Research	Python, NLP, LLMs, Bangla NLP, Cross-lingual Evaluation, Lexical Probing
Tools	Git, GitHub, VS Code, Firebase, Vite, PyQt6, .NET, Socket.io, Clerk, Cloudinary

Education

BSc in Computer Science and Engineering, BRAC University - Passing Year: 2026

Thesis: Probing Cross-Lingual Lexical Representations in Multilingual Large Language Models: A Surface-Controlled Evaluation for Low-Resource Bangla Dyslexia Screening.

Supervisor: Professor Dr. Farig Yousuf Sadeque, BRAC University. Published paper link: Coming soon.

Repository: github.com/stuBBornButterfly/Dyslexia_Thesis

Selected Projects

SoundSip - Group-built full-stack music streaming platform. My work covered persistent playback bar, queue controls, shuffle/repeat, Zustand player state, liked songs, playlist CRUD, home dashboard sections, listening history, user search, settings, and Socket.io activity broadcasting.

Bangla Dyslexia Screening Research - NLP/LLM thesis under Professor Dr. Farig Yousuf Sadeque at BRAC University, studying cross-lingual lexical representations for low-resource Bangla dyslexia screening.

Disaster Management System - Team MERN emergency platform. Contributed live operations map with React Leaflet, dashboard UI, REST API integration, filters, markers, and role-based map interactions.

DevPulse Issue Tracker API - Deployed backend API with JWT authentication, contributor/maintainer roles, issue CRUD, filtering, sorting, PostgreSQL schema, raw SQL, and system metrics.

Pulse Overlay Stats Checker - Windows performance overlay for FPS, CPU/GPU metrics, temperatures, RAM/VRAM, disk, network, clocks, and power using .NET, LibreHardwareMonitor, and PresentMon.

Additional Projects

Prism Video Player - PyQt6/mpv Windows media player with local/URL playback, playlists, SQLite resume history, subtitles, screenshots, A-B loop, speed controls, drag-and-drop, and keyboard shortcuts.

3D Tree Watering Game - Focused 3D tree watering game concept with player movement, environmental interaction, and an objective loop documented in the project repository.
