

Hasan Mohammad Sayem

Full Stack Developer | AI, NLP & LLM Enthusiast

Badda, Dhaka | sayemhasan4700@gmail.com | 01705298966 | github.com/SayemHasan74

Profile

CSE student from BRAC University focused on full stack development, backend APIs, dashboards, desktop tools, AI, NLP, and multilingual large language models. Comfortable building practical software from API integration to polished interfaces, with a research interest in Bangla language technology and model evaluation.

Skills

Frontend	HTML, CSS, JavaScript, React, Tailwind CSS, Responsive UI, Dashboard UI
Backend	Node.js, Express, REST APIs, MongoDB, MySQL, Authentication, API Integration
AI & Research	Python, NLP, LLMs, Bangla NLP, Cross-lingual Evaluation, Lexical Probing
Tools	Git, GitHub, VS Code, Firebase, Vite, PyQt6, .NET

Education

BSc in Computer Science and Engineering, BRAC University - Passing Year: 2026

Thesis: Probing Cross-Lingual Lexical Representations in Multilingual Large Language Models: A Surface-Controlled Evaluation for Low-Resource Bangla Dyslexia Screening.

Supervisor: Professor Dr. Farig Yousuf Sadeque, BRAC University. Published paper link: Coming soon.

Repository: github.com/stuBBornButterfly/Dyslexia_Thesis

Selected Projects

Bangla Dyslexia Screening Research - NLP/LLM thesis under Professor Dr. Farig Yousuf Sadeque at BRAC University, studying cross-lingual lexical representations for low-resource Bangla dyslexia screening.

Disaster Management System - Team MERN platform. Contributed live operations map with React Leaflet, dashboard UI, REST API integration, filtering, markers, and map interactions.

Pulse Overlay Stats Checker - Windows performance overlay for FPS, CPU/GPU metrics, temperatures, RAM/VRAM, disk, network, clocks, and power.

Prism Video Player - PyQt6/mpv desktop media player with local and URL playback, playlist, resume history, subtitles, screenshots, and keyboard shortcuts.

Additional Projects

3D Tree Watering Game - Interactive 3D game project focused on tree watering gameplay, environment interaction, movement, and objective logic.

Amar Gan - Music-focused project entry prepared for a future media experience with playback, playlists, search, repository, and live deployment details.
